

SG 1601 1/16 2.4G Brushed RC Car Big Foot High Speed Vehicle With Head Lights

Description:

Basic information	Brand:SG Scale:1/16 Model:SG1601 Speed:30KM/H	Power system	ESC+receiver:2 in 1 Motor:brush rc 390 Servo:5line 17g
Transmitter	Frequency:2.4 GHZ 2CH Battery: 4XAA battery(not included)	Battery:	7.4V 700mAH
others	Charge time:2-2.5H USB line Using time:9min Control distance:80m Functions: forward, backward, left, right Proportional control:proportional control	Dimension	Size:27*21.5*13 cm(LxWxH) Package size:30x26x19cm Track base:17.5cm Wheelbase:18cm Wheel diameter:78mm Weight:1395g

Features:

- 1: Charging protection: constant current and constant voltage balance charging, protection function for battery overcharge and overcurrent.
- 2: Motor anti-seize protection.
- 3: High temperature protection: When the operating temperature is higher than the set condition, the drive control circuit stops. Work, wait for the temperature to drop to a safe value and resume work.
- 4: The power-down function of the power down voltage, the battery is lower than about 6.3-6.4V, automatic power-off to prevent the battery from over-discharge and damage.

Product introduction:

1. 2.4G full-scale synchronous remote control system. Full-scale throttle / steering
2. Four-wheel-shaft independent horizontal shock-absorbing suspension system

3. 2CH 2.4G integrated ESC / receiver, 5-wire steering gear
- 4, Strong battery power: 7.4V, 700 Mah Li-ion battery
5. Adjustable spring travel aluminum ring suspension
6. Full car ball bearing
7. USB charging cable
8. With LED lights (not installed in the package) 9. Simulation Large caster leather grip

Package included:

1X RC car

1x Charger

1x Transmitter

Not affected by terrain

Grassland

Sandy beach

Wilderness

Front and rear metal differential

More smooth curve driving

Throttle ratio

Turning adjustment

On/off

Left/right

forward/backward

Brush rc car

Light up the dark road

Highlight led front lamp
