

# TX768 RC Boat 2.4G Brushless High Speed Remote Control Ship 30km/h Professional Speedboat

## Turbojet power design

Adopting brushless vortex jet technology, it provides more efficient and stable power output, making the acceleration and steering of the ship more flexible.

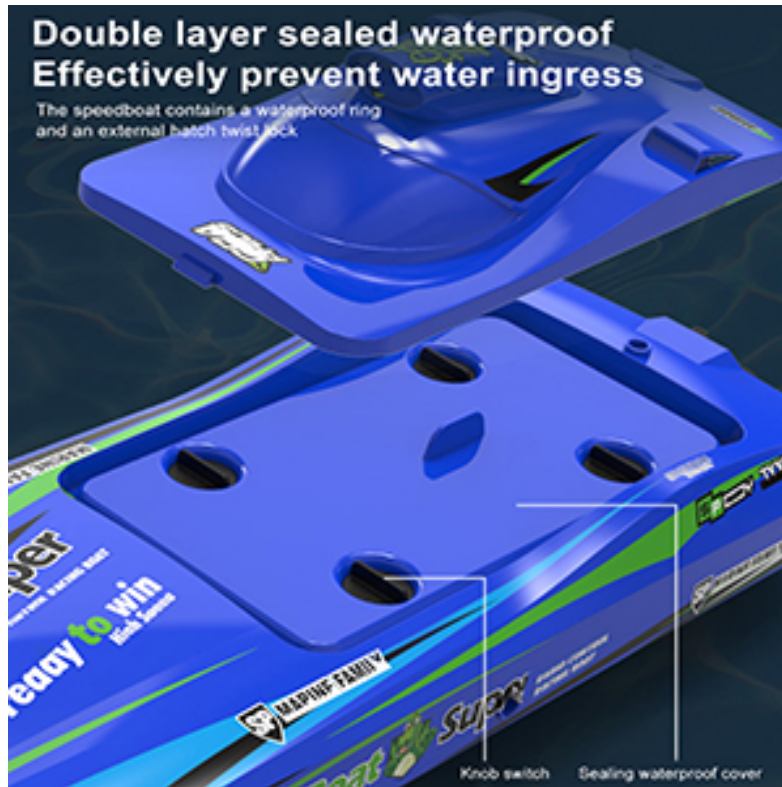

### Water-cooled circulation system

The water-cooled circulation system effectively reduces the working temperature of the boat, ensuring its stability and durability during long-term high-speed operation.

Low battery reminder

Low battery over navigation reminder function, timely reminding users of low battery to prevent ships from losing power in the water.

## Sealed and waterproof design

Double-layer sealing and waterproof, effectively preventing water from entering. The speedboat contains a waterproof ring and an external hatch cover twist lock for double protection, which effectively protects the hull and extends the service life.

## Brushless Motor

The brushless 2212 motor combined with water circulation power technology is not afraid of motor overheating and is energy-saving.

2.4G remote-controlled

2.4G remote-controlled ship can control the direction and speed of ship movement from a distance, making operation more convenient and flexible.

### Specifications:

- Material: Plastic, Electronic Part
- Frequency: 2.4GHz
- Battery: 11.1V 2000mAh
- Charging Time: About 180min
- Working Time: About 15min
- Motor: Brushless Motor
- Speed: 30km/h
- Control Distance: 250m
- Remote Controller Battery: 4\* AA Battery (not Included)
- Size: 13cm/5.12inch\*40cm/15.75inch\*9.5cm/3.74inch

### Package List:

- 1 \* Remote Control Boat
- 1 \* Remote Controller
- 1 \* Battery
- 1 \* Screwdriver
- 1 \* Hexagonal Screwdriver
- 1 \* USB Charging Cable

- Package Size: 42.5\*25.5\*12cm
- Package Weight: 1200g
- Gift Box Package
