

WL124020 1:12 Rc Car Brushless w/124020 Remote Control Car High-Speed 60KM/H 4wd Electric Off-road Vehicle

Functions:

1. Simulation structure design, real vehicle control feeling (remote control, realizing high-speed driving, instantly accelerating, decelerating, braking, backward turning and lighting control)
2. The shock-absorbing performance of the four-wheel metal shock-absorbing system can better adapt to the bumps caused by various terrains, and the independent suspension swing arm runs smoothly in a straight line and has excellent body handling posture
3. The whole car adopts ball bearing alloy gear to simulate the metal bottom plate of differential structure, which makes the driving smoother and the gear durable.
4. Adopt 7.4V 2200mAh high-rate lithium-ion battery, with brushless motor power output, and the speed reaches 60km/h
5. The steering is controlled by 1.7KG 3 line steering gear, which is more stable in straight line driving, more flexible in cornering control and durable.
6. Natural rubber tires with strong ground adhesion and friction resistance
7. Cool LED light car shell can control breathing headlights and simulation turn signal brake lights for barrier-free operation at night.

Top speed: 60km/h

Usage time: about 7 minutes.

Charging time: 3 hours

Remote control mode: 2.4G remote control

Remote control distance (m): about 100m.

Driving motor: 2845 brushless motor

Battery details: 7.4V 2200mAh*1 (4 5#AA batteries used for remote control are not included).

Product performance: This product only uses 2S 7.4V battery.

Charging equipment: instruction manual, USB charger, zinc alloy cross sleeve and yellow handle cross screwdriver.

Racing car

Experience the coordination
Between speed and passion

1:12
SCALE

Strong Power Output

High Speed Driving, Rapid Acceleration,
Deceleration, And Braking
Maximum Speed Up To 60KM/H

SPEED
60 km/h

Independent Semi Metal shock Absorber

The body adopts 4 independent shock absorbers to effectively alleviate the bumps on the road surface caused by small potholes

Real Time Four-Wheel Drive Power

Conquer the road with speed
Unleash your potential on racetrack
